

# Protect Mission-critical Kubernetes Applications & Data with Ease

## Secure Unified Intelligence Through the Tactical Edge

The U.S. Department of Defense's (DoD's) Combined Joint All-domain Command and Control (CJADC2) initiative is designed to streamline battlefield intelligence both coming to and from leaders, combatant commands, sensors, and warfighters across land, sea, air, space, and cyber domains. For optimal situational awareness, data for intelligence must be timely, immutable, encrypted both in-transit and at-rest, and always available wherever users are, online or off. It also must have a low probability of detection and interception (LPD/LPI).

## Gain Radical Resilience

With Veeam Kasten, military teams can see, make sense of, and act on real-time AI-infused information for command, control, communications, surveillance, reconnaissance, and cyber operations (C5ISR). Veeam Kasten provides continuity of operations (COOP) in harsh, contested environments with instant automated backup and recovery functions for multi-cloud and virtual machine (VM) workloads anywhere in the world. Kasten provides the holistic protection, application mobility, resilient storage, and instant data retrieval features that the U.S. DoD needs to ensure network, application, edge node, and end-user data is well-protected against data corruption, loss, and manipulation by bad actors.

Application Mobility

## Why Veeam Kasten?

Secure by design, policy-driven and extensible, Veeam Kasten leverages native Kubernetes API and capabilities like full-spectrum consistency, database integrations, automatic application discovery, multi-cloud mobility and a unified, easy-to-use web-based interface. **Learn** how, like the [U.S. Navy](#), you can integrate, streamline, and automate data management from advanced intelligence-gathering technologies that foster better cooperation and deliver actionable intelligence directly to commanders and soldiers in a secure and timely manner.

## Veeam Kasten Certifications

- Secure Software Development Framework
- Images and SBOM available in IronBank
- FIPS-140-2 3rd party validation
- TAA Compliant

### About Veeam Software

Veeam®, the #1 global market leader in data resilience, believes every business should be able to bounce forward after a disruption with the confidence and control of all their data whenever and wherever they need it. Veeam calls this radical resilience, and we're obsessed with creating innovative ways to help our customers achieve it. Veeam solutions are purpose-built for powering data resilience by providing data backup, data recovery, data freedom, data security, and data intelligence. With Veeam, IT and security leaders rest easy knowing that their apps and data are protected and always available across their cloud, virtual, physical, SaaS, and Kubernetes environments. Headquartered in Seattle with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, including 74% of the Global 2000, that trust Veeam to keep their businesses running. Radical resilience starts with Veeam. Learn more at [www.veeam.com](http://www.veeam.com) or follow Veeam on LinkedIn [@veeam-software](#) and X [@veeam](#).
